Armor Charger (TKN & CJ)

How to Use

The Armor Charger is an entity that lets players top up their armor. This version is the one available through Tokens (TKN) and on Custom Jobs (CJ), so it is tied to your job or purchase rather than the Medic job.

To use it, place the charger down inside your base, then press **E** on it to refill your armor. It is a quick way to keep yourself topped up before a raid or defence without needing a medic to come to you.
