Medic Armor and Health charger

How to Use

The Medic Armor Charger and Health Charger are entities used to restore players' armor and health. They are mainly used by the Medic job to heal and resupply other players as part of roleplay.

To use them, place the charger down and let players walk up and press **E** on it to top up their health or armor. Chargers are a handy way for medics to earn money by offering healing and armor as a service to other players around the map.
