Money Printers

A Money Printer with no upgrades and a CPU.
image.png Image not found or type unknown

The money printer is the primary way to make money. By default, it prints **£6000** every **5 minutes**.

On the front of the printer you can see the **health** and the **power** of the printer.

Once the health reaches 0, the printer will explode.

Once the power reaches 0, the printer will stop printing until you refill it with a **charge.** You can buy a charge in the **F4 menu > Entities**.

CPU and Gold CPU

The **CPU** decreases the time it takes for the printer to print money by **1 minute.** This can be further reduced with a **Gold CPU** (made via crafting) which will reduce the time by a further 0.5 minutes, making the lowest amount of time it can take for a printer just 3.5 minutes!

Plugins

Master
The **master** plugin is available to all players. It costs **£25000** to add to the printer, and adds an additional **£9500** per print.

VIP
The **VIP** plugin is available to players that buy the **VIP** rank or the **Ultimate VIP** rank in the token shop. It costs **£50000** to add to the printer, and adds an additional **£9000** per print.

Gang

The **gang** plugin is available to players in a gang that have **purchased the plugin.** It costs **£20000** to add to the printer, and adds an additional **£5000** per print.

Extra

The **extra** plugin is available to players that buy the **Extra Printer** item in the **token shop (125 TKN).** It costs **£15000** to add to the printer, and adds an additional **£5000** per print.

> You take take money out of the printer at any time by pressing **use** while looking at it, but try not to take money out of the printer as soon as it prints! Leaving money in the printer will add a multiplier to how much it makes per print!

Stealing Printers and Self Destruction

Somebody stolen your printer? Worry not! Simply type **!selfdestruct** in chat to start a countdown of **40 minutes.**

If you find your printer while this countdown timer is happening, you can simply press **use** (E by default) to cancel the timer.

> Once the timer is up, the printer will explode.
