Hack PD Mission

Overview

The goal of the Hack PD mission is to break into the Police Department and hack their systems. This is a high risk mission, as you will be going straight into Civil Protection territory to complete it.

How to Play

After the Terrorist Leader starts the mission, make your way into the PD and begin the hack at the marked terminal in the mayor's office. The hack takes time to complete, so your group will need to hold the area and protect whoever is hacking from Civil Protection.

Once you successfully hack the PD's mainframe, you can remove/add laws, run lotteries and more!

If the hack is stopped, you may need to restart it. Complete the hack to finish the mission and earn the reward.
