Bhop Swep

Here is a short video explaining how to use the BHOP SWEP.

https://www.youtube.com/embed/E7CB2lySR80?ab_channel=Flip_

Grappling Hook

Overview

The **grappling hook** is a **private SWEP** that allows you to reach higher places without the need of a **magic sword** or **climb swep.**

How to Use

To use the grappling hook, simply click any part of the map with the grapple hook out (not a prop!). This will show a little red cube where the grapple hook is tethered, along with a line going from you to this tether point and a sound effect that sounds like a rope.

After this happens, simply wait about 5 seconds and hold jump. You will fly just above the tether point.

Magic Sword

The magic sword has 3 uses;

The **primary function** (left click) is to **swing your sword** as a melee weapon.

The **secondary function** (right click) allows you to **jump in the air**.

The **third function** can be used pressing reload (R) allows you to **gain 20 HP**.

Camo

The Camo SWEP allows you to go **invisible** and **hide from players**. It is great for if you want to try raid a base but the owner has just came back, or if you need to hide from the Civil Protection!

To use the Camo SWEP, simply left click and you will go invisible. Keep in mind, you have to **stay still** whilst you are invisible. If you move, **people will see you** until you stop moving again!

Disguise

Disguise allows you to **change your player model** into anyone else's on the server. This helps you get into some places where you shouldn't normally be. Such as into a gang base, or into the **Police Department**.

Keep in mind, **it doesn't change your name** so you will have to make up a story as to why you're there!

You also **won't be able to switch item** while you are disguised, if you do your **disguise will be removed!**

Medkit (HL2)

Overview

The Medkit heals your or other players' health **in chunks** like it does in Half Life 2.

How to Use

The Medkit has **two functions;**

- The **primary function** (left click) heals 20 hp to **other players.**
- The **secondary function** (right click) heals 20 hp to **yourself.**

> The medkit has **100 ammo** that **slowly regenerates** over time, **even when not held**.

Medic Kit (DarkRP)

Overview

The Medic Kit is the **Medic** job's healing tool. Unlike the Medkit (HL2), which heals in chunks, the Medic Kit restores health **gradually**, ticking up **1 hp at a time** while it is being used.

How to Use

The Medic Kit has **two functions;**

- The **primary function** (left click) heals **other players**.
- The **secondary function** (right click) heals **yourself**.

Hold the button down and aim at your target to keep healing. Health goes up steadily rather than all at once, so healing someone from low health takes a few seconds.
