Medic Kit (DarkRP)

Overview

The Medic Kit is the **Medic** job's healing tool. Unlike the Medkit (HL2), which heals in chunks, the Medic Kit restores health **gradually**, ticking up **1 hp at a time** while it is being used.

How to Use

The Medic Kit has **two functions;**

- The **primary function** (left click) heals **other players**.
- The **secondary function** (right click) heals **yourself**.

Hold the button down and aim at your target to keep healing. Health goes up steadily rather than all at once, so healing someone from low health takes a few seconds.
